January 2, 2008

Mr. Jeffrey Stoker, President  
Safety Track of Michigan  
443 Waterbury Court  
Belleville, MI 48111

Dear Mr. Stoker:

Recently, the City of Riverview purchased several Internet Tracking Vehicle Units from your company. These units were subsequently installed in a few key City-owned vehicles in order to help our administration track the overall usage and cost effectiveness of these vehicles for both practical and budgetary purposes.

As is the case with most municipal purchases, it took a bit longer than expected to obtain the necessary approvals and proceed with our order. However, I am pleased to report that since installation, we have been extremely pleased with the performance of the products along with their ease of operation. The amount of data that can be obtained from just one of the units is truly invaluable and will go along way in helping our City to save time and money. In short, we feel that this is a good long term investment for our City.

In particular, I want to thank you for all of your direct involvement in our initial purchase of these products and for your professionalism before, during, and after the sale of the tracking units and I would be happy to provide a personal reference for any potential customer that is looking to do business with your Company.

Sincerely,

A handwritten signature in blue ink that reads "John Hajkus".

John Hajkus  
Human Resources Director  
City of Riverview
